Mines and Prospects--Furnaces and Mills

Lead Ores of U. S. Over Rio Grande Rails

Company's Record for January, With Tonnage to Be Greatly Increased This Month.

That the lead-bearing resources of the United States Mining company at Bingham are becoming hourly more producthe record at the receiving station on the line of the Rio Grande rallway at Bingham affords emphatic evidence. Over its rails there was forwarded to the furnaces of the company at Bingham Junction as much as 80 tons of this class of ere, while that the consignments from the same source the present month will reac a total of 1000 tons is foretold in figure for the first half of it. These ores, sai Superintendent Allen on his return from Superintendent Allen on his return from camp, are coming from the stopes in the lold Jordan group, in which there is yet plenty of room for them to make as development shall progress. Of this class of ore, the Old Jordan, according to the record of the valley smelter, has been very productive in years previous to its absorption by the present company, and that this record will be repeated is possible as long as the intelligent prospecting of the large area of unexplored territory shall continue.

Although no reference to it has been made by the management, it was said during the day that in the old stopes from which the vast toneages were mined in fermer years is yet remaining a very large quantity of ore, that has acquired a commercial valuation under conditions more favorable to its reduction, while in addition to this is another class that during one period was quite profitably milled, and that in addition to the same acquired a fine of which it was capable, it was easerly sought as a flux. At the Galena group the volume of lead ore is also increasing as work is extended along the fissures, and the outlook there at this time is quite assuring. All this, and yet the uninitiated of Beston and other localities, upon which the publication in which it appeared was grafutiously inflicted, were 'informed' that the United States Mining company was without a pound of lead ore with which to come to market.

THE METALS MARKET.

President Bamberger of Daly West or Present Conditions.

The active consumption of both metals. said President J. E. Bamberger of the Daiy West, during the day, undoubtedly foretells a steady market for lead and copper, and that silver will maintain a position around present prices he firmly believes. Since his departure from the city several weeks ago President Bamberger has fraternized with and shared the information of not a few whose study by day and night is the metals market, and these authorities, eminent among whom are the officials of the American Smelting and Refining company are all of a similar conviction. There has never been a period during his frequent visits East where the attitude of the investor was more favorable to the mining industry, added President Bamberger, and while many promoters are pleading that they have been, undoubtedly short in their reach. What is exacted to that whatever is commended to them must stand up under thorough examination and with that they are ready to split the risk of future development whatever that may be. He is looking for a very large amount of money to come in this direction the present year, and the peason should be one of liberal investment. With Hon, David M. Hyman of Cincinnati, President Bamberger, will leave for the Coccur d'Alene region. Idaho, in which to inquire into their interests, to-morrow. copper, and that silver will maintain a

FORMALLY ADMONISHED.

Board of Health Serves Notice on the

The local representatives of the various smelters were, during the day, officially notified of the recent findings of the County Board of Health, in which it was deereed that the smoke now issuing from stacks on which so many mouths are re-ilant for food must be summarily abated. The notice was served through the Sher-iff's office, and, of course, was immedi-ately referred to counsel for the various companies. Meanwhile, the effort to active referred to counsel for the various companies. Meanwhile, the effort to abate the annoyance is progressing as it has been for some time, with the managers exerting every energy in conscientious endeavor to correct the condition complained of. They are probably unable to move any faster in the effort than are they at present, nor is it likely that they will be required by the courts to close down on the order of the Board of Henlin of the county. On the contrary, the plants will probably be operating at the same time a month hence, with everything to foreteil employment for a larger number of mouths as the season advances and new mines and ore bodies are opened up.

SURPLUS PILING UP.

Copper Concentrates Doing Much for Utah Company's Treasury.

The management of the Utah Copper company of Bingham yesterday added to the contents of its stocking the proceeds of another lot of high-grade copper concentrates, running well up in silver and gold, consisting of 100 tons, and at the sampler has another consignment that three cars were required to handle, with three lots at the smelter. The record at the mill at this time is exceeding all previous ones, and while it is but the first unit in the equipment with which the undertaking is to be provided, the surplus is hourly increasing. Meanwhile the officials of the company are preparing to authorize the management to proceed with the construction of the second unit, and that this will begin before the year is much older is positively assured. The demand for the shares of the company in the local market continues very active, with \$10.25 bid for them during the day, these figures giving the whole a valuation of \$4.612.500, and yet it is but a Lilliputian compared with the stature that will have been attained when the equipment is completed. of another lot of high-grade copper con-

ORES BY EXPRESS.

Rich Consignments From Tonopah Refuse to Be Delayed.

As an evidence of the richness of the mines of Tonopali, a big shipment of ore went through Reno last evening and ore went through Reno last evening and was in charge of Wells Fargo. It was consigned to one of the big smelting companies, in California. The assay value of the ore has not been given, although it must have been very rich, says the Journal. The ore was from the Tonopah-Extension, the McNamara and the Midway mines, three of Tonopah's richest properties. It is understood that the cause for shipping the ore by express is due to the embargo placed upon freight by the railroad companies a few day

THE DAY ON 'CHANGE.

Trading Light, but the Market Maintained Its Strength.

Notwithstanding the interval between

alls and the opportunity afforded the talnt to blow off, the day's business on the mining exchange was confined to 15,200 shares of stock, for which \$1947.87 was paid. Notwithstanding this, the position of the traders was generally firm, Uncle Sam advancing steadily to 19% cents, Sam advancing steadily to 19% cents, while May Day moved up to 12% cents, with Butler bringing 13½. New York was marked down to 57½ cents, after an opening at 90, while Ajax closed on a transaction at 14½ and Sacramento on one at 10. In the sparring Daly was followed up to \$2.55 and Daly-Judge to \$3.37½, while Ontario refused to relax below \$5 or Horn Sliver to come out at less than £1. Ingot showed some animation around 2½, while Yankee Con brought 35, the day closing on the following market:

Boston Market Strong. Special to The Tribune.

Special to The Tribune.

BOSTON, Mass., Feb. 23.—The local market opened with a great show of strength and activity and the shares were neared adays, and prices were well advanced. After the first hour traders were inclined to take profits, and the commission houses were reported to be well supplied with orders to buy, but the afternoon session showed less activity, in sympathy with the New York market. The closing was weak Hornblower & Weeks, brokers, 53 State street, Boston, and 10 Wall street, New York, furnish the following quotations:

Reports on Majestic in Newhouse's Hands

New Management Forwards His Conclusions and Takes the Train for Inaugural Ceremonies.

With the fate of his latest undertaking in the copper, gold and silver-bearing reglons of the south positively assured and all other interests responding as he would have them, Hon. Samuel Newhouse de parted for Washington City during the day, where he will remain through the inaugural ceremonies as the guest of one of the country's most eminent citizens, and after which he will return to his home in this city. To him, on the eve of his departure, was submitted by Manager Morris M. Johnson, who had been assigned to make the final examination of the Majestic company's properties, a most voluminous report with which he had, with Mr. Thomas, arrived from the field, and while Mr. Newhouse declined to divulge its contents, the fact that he will continue the management indicates conclusively that the findings of his representative are favorable to the proposition. With these conclusions in his pussession, and as the one to whom the Majestic company has appealed to make possible results so long sought. Mr. Newhouse will, in all probability announce the future policy of the undertaking on his return from the East.

When the man to whose efforts and daring the wealth of this and neighboring States has been made to respond so lavishly does return to the city, it was said last night that it will be as the occupant of a private car that shall enjoy the liberties and the privileges of all tracks, from the shores of the Atlantic to those of the Pacific, from the great guif of the South to that of the North. That the miner to whom the diggings and those who people them are so largely indebted has been accorded this splendid recognition, will be a source of gratification to them as profound as is it to the distinguished gentleman who shall enjoy the privileges it accords him. inaugural ceremonies as the guest of one of the country's most eminent citizens,

FIND AT HAWTHORNE.

Another Miner Makes Sensational Discovery of Gold.

James Hegarty, who made the first to cations at Hawthorne, Esmeraldo county Nev., and who is with S. S. Johnson of Reno, the owner of the Perseverance group. Says these ores are showing as much as \$25 gold per ton, with some silver, while seven inches of ore in another of the group affords an average of \$418. Hegarty is the only locator in that part of the range, the rearest location being eleven miles distant. The place had been passed up by several miners and prospectors on account of so much iron croppings.

roppings.

Another feature of the location is the large deposits of sylvanite. Hegarity's impression is that the permanent camp will be at Tonopah and north and northeast of the town. The mineral trend runs through a country of fissure veins from the northeast to the southwest.

PECK PLANT STARTS.

Whistles Blow and Reduction of Zinc Ores Inaugurated.

A bulletin from Frisco, the home of the great Horn Sliver mines, advises the management of the properties that the Peck plant, at which their zinc product is to be reduced, went into commission as to be reduced, went into commission as scheduled on Wednesday, and that everything has started out in a manner that fofetells the most satisfactory results. From this time the tonnage will be gradually worked up to the capacity of the plant, which means not only big earnings for those who have made the undertaking possible, but a source of considerable revenue for the mining company. At present the management is sending its zinc ores to the works at the Klola smelter in Kansas, the contract calling for 200 tons. To what smelter the product of nsas, the contract calling for To what smelter the product of the mill will go has not been determined

Mining Notes.

Fred P. McGurrin will depart for the hills The Boston Con. is reporting at this time with 100 tons daily at the Bingham Con.'s

n this city.

Monars. Harris K. Masters, and L. A. Jeffs.

Sidney Bamberger, manager of the Fortuna Charles A. Molson, the resident representa-ive of the Exploration company of London in San Francisco.

is in San Francisco.

George Z. Edwards, manager of the Lincoln company's mines and mill at Pearl, Ida. leaves for the north egain temorrow.

The arrival of S. W. Eccles, traffic manager of the American Smelting and Refining company, is echequied for tomorrow.

The management of the Manamoth of Tintic yesterday marketed ninety-two tons of ore on controls showing 118 gold, with \$14 ounces silver per ton.

Charles S. Lerinz, a well-known Montane.

Charles S. Loring, a well-known Montana engineer, has arrived from the north, accom-panted by his family, and will remain per-manently in the State. Manager MacVichie of the Bingham Con-has returned, after a visit to the camp in which his company's interests are located, and with the behavior of its resources is very much pleased.

Ben T. Lloyd, who is financing the Gold-field-Guerdon Mining company, has just is-sued a prospectus, which tells of very prom-ising locations in the land of gold that are to be developed by Salt Lake and Ogden mi-ning men.

Majestic Mines Suspend.

Active development at the properties of the Majestic company out of Millord has been suspended on the order of the management, the suspended on the order of the management, the suspension to continue said a member of the staff, last night, until further orders from the field administration, at the head of which is now the Hon Samuel Newhouse. Meanwhile, Experintendent E. F. Freedenthal and his foreman are on the ground, with a few persons, to maintain order.

Visiting Oil Interests.

A V. Taylor departed over the Bio Grande last night to receive a number of visiting interests in the property of the Plutsburg and Salt Lake Mining company, and with them will visit the company's various holdings. Mr. Taylor is making a most energetic endeavor in behalf of the proposed refinery, with everything now favorable to successful results.

Ores and Bullion.

In the ore and builton market the day's settlements were reduced to \$81,200, McCornick & Co. reporting them as they follow; fullion, \$23,700, gold, silver, lead and copper ores, \$21,000.

In the metal market silver ruled at \$604 cents an ounce, lead at \$1.2054.45 per hundred pounds, and casting copper at \$105 cents a pound.

Tonopah-Goldfield Sales.

Monday's transfers on the San Francisco exchange were recorded as they follow: Mac-Namara, 19,100 at 70,950; Original Bullfrog. 5000 at 42,940; Redtop, 22,850 at 309,440; North Star, 5000 at 47,771; Midway, 2500 at 41,251; Montana-Tonopah, 700 at 81,0593,10; Homo, 6900 at 500.

The King's President Invades New Camp

Hon. David Keith's Appearance in Nevada's Diggings Stimulates Interest Over There.

Arrivals from the West report the in-

Arrivals from the West report the inhabitants of Goldresd, or Kawich, congratulating themselves upon the appearance of none other than Hen David Keith, president of the Silver King of Park City, in the diggings of that Nevada camp, he according to the story with which they have come, having been to join Thomas J. Lynch in the acquisition of properties adjoining those of the company by which the Gold Standard group, or the original discovery, is being operated. It is said of the Keith-Lynch purchase that it is undoubtedly one of the biggest bargains held out by the new camp of gold from which the original company is at present mining its phenomenal ores. Mr. W. Armstrong, the representative of Mr. Keith, who was seen during the day with reference to the report from the West, said he was unable to confirm it at this time. However, it comes from reputable sources and that the president of the King has interested himself with Mr. Lynch, who has scored so many triumphs in the region, is quite plausible, as it is but a short time since he was a visitor to the camp. It was upon the Comstock that the distinguished mainer gver whose presence the new camp is confratulating itself, and which is not distant from a field in which se much interest is now manifested, imbibed many of the lessons that have since served him and his associates so munificently, and his operations there as in other localities, will do much, no doubt, to add to the confidence of the mining world in its ultimate productiveness. Mr. Keith is at present in Los Angeles, where he will remain for some time.

TOOK A STRAW VOTE.

Interesting Experiment in a Restaurant.

An advertising agent, representing a prominent New York magazine, while on recent western trip, was dining one vening in a Pittsburg restaurant.

While waiting for his order he glanced ver his newspaper and noticed the advertisement of a well-known dyspepsia pre-paration, Stuart's Dyspepsia Tablets. As he himself was a regular user of the tablets, he began speculating as to how many of the other traveling men in the dihingcom were also friends of the popular emedy for indigestion.

He says: I counted twenty-three men t the tables and in the hotel office I took he trouble to interview them and was preprised to learn that nine of the twen-y-three made a practice of taking one or wo of Stuart's Dyspensia Tablets after

two of Stunrt's Dyspepsia Tablets after each meal.
One of them told me he had suffered so much from stomach trouble that at one time he had been obliged to quit the road, but slice using Stuart's Dyspepsia Tablets had been entirely free from indigestion, but he continued their use, especially while travellog, on account of irregularity in meals and because like all traveling men he was offen obliged to eat what he could get and not always what he wanted Another, who looked the picture of health, said he never ate a meal without taking a Stuart Tablet afterward, because he could eat what he pleased and when he pleased without fear of a sleepless right or any other trouble.

Still another used them because he was subject to gas on stomach, causing pressure on heart and lungs, shortness of irrath and distress in chest, which he no longer experienced since using the tablets regularly.

Another claimed that Stuart's Dyspensia

healthy, wholesome condition so effectivity as Surart's Tablets.

Surart's Dyspepsia Tablets contain the natural digestives, pepsin, diastase, which every weak stomach lacks, as well as nus, hydrastin and yellow parilla, and can be safely relied on as a radical cure for every form of poor digestion. Sold by druggists everywhere.

The strongest and most beneficial Intestinal Stimulant is

PLUTO WATER KING OF LAXATIVES.

Contains more sulphuretted hydrogen than any spring water in the world-always works.
